Game Developer / Artist

maxburkhardt@xs4all.nl · murkyperki.github.io · Amsterdam, NL ·

SKILLS

Unity	
C#	
Unreal Engine	
Photoshop	
Illustrator	
Blender	
Git / GitHub	

EDUCATION

Game Development

HvA, Amsterdam
2023 – present
Propedeus: ✓ passed

HAVO

Graduated 2020

Digital Art

Online course

LANGUAGES

Dutch	Native
English	Fluent
German	Basic

INTERESTS

Baseball · Travel
Drawing · Video Editing
Games · Gym · Judo

PROFILE

Second-year Game Development student at Hogeschool van Amsterdam (HvA), splitting my time between gameplay programming and 2D/3D art. I've finished several projects in Unity and JavaScript from design through to code and visuals, and I'm most comfortable when I can move between both disciplines. I travel whenever I get the chance and play competitive baseball, which keeps me sharp when things get stressfull.

PROJECTS

Paperboy Unity · C#

- Personal project: a 2D game where a boy trapped inside a drawing uses drawn lines to survive.
- Built a line-drawing system with temporary mouse lines and a permanent trail under the player.
- Wrote collision and trigger logic for ball collection, enemy chasing, and line-erasing enemies.

Cave Goobers JavaScript · p5.js

- 2D platformer where you collect Goobers to unlock a boss fight, built in JavaScript.
- Wrote a custom AABB collision system and player movement from scratch.
- Built the boss state machine (idle, telegraph, slam) and the Goober slot damage system.

Stokrun C# · MonoGame · Node.js

- Quoridor-inspired board game with a C# client talking to a Node.js server.
- Worked on turn and AP logic, UI state updates, and syncing client actions with the server.
- Solved tricky desyncs where the client and server disagreed on whose turn it was.

Facility Map Unity · ProBuilder

- Level design project about how players navigate and read a space.
- Started with paper prototypes to test room flow, then built a full greybox in ProBuilder.
- Added textures, prefabs, and interactive elements like animated doors.

WORK EXPERIENCE

Hospitality, Various Venues

2021 – present

- Full-time in cafes and restaurants during gaps between studies; part-time during term.
- Ran busy service shifts, showed new staff the ropes, and kept stock records.

STRENGTHS

- Pick up new tools and engines quickly: got Unreal basics down in two weeks for a project.
Comfortable switching between art and code depending on what the team needs.
- Travelled across multiple countries solo, so I'm used to figuring things out independently.
- Playing competitive baseball since age 12, good at staying focused and calm under pressure.
